IST 263 Project Milestone 4 – Wireframes

Name: Ines Harouchi

Description:

My idea for the website project is to create a "Guide to Syracuse University" from the perspective of a senior about to start my final year. This website would allow me to reflect on my time in college, from navigating my two majors to taking advantage of the incredible resources that Syracuse has to offer. It would include general information about the school, a reflection on my own experience, tips and resources for new students, and my recommendations around campus and the city.

Research:

Write down the urls of three websites you looked at to research layout for the type of site you are creating. For example, if I was creating an auction website, I might look at pages on https://www.ebay.com/.

url1	https://www.theblondeabroad.com/
url2	https://www.thegirlhood.org/
url3	https://pinchofyum.com/

Wireframes:

Use MockFlow or another diagraming software to create layouts for your pages. Consider the following:

- 1. Where is your navigation going to be located on every page.
- 2. Will you need a footer?
- 3. How can you make a layout that is visually interesting and helps communicate your site content?
- 4. Don't forget you must have at least 2 distinctly different page layouts.

Paste Your 3 Page Layouts Below

I apologize for the small version of the layout, I was working with the page zoomed in on MockFlow and didn't realize that it was as narrow as it is.
